

CHICAGO SUN TIMES LUNCHEON
Tuesday, 6 May 1980

Points to Make

1. Trend to core charter - best thing that could happen
 - * Institutionalizes oversight which is working well - both Congress and Admin point of view.
 - * Must focus on authorities (positive approach) vice abuses (negative)
 - Abuses - effective oversight in place - destructive to keep reliving
 - Authorities - must focus on how help IC do job
 - US persons - already well protected - Surveillance Act - Attorney General approvals, etc.
2. Must stem leaks - destructive in both short and long term
 - * FOIA - only limited exemption
 - * Identities - who is helped if revealed? Why enemies?
+ You couldn't operate with your sources thus exposed
3. Future direction of IC energies
 - * Anti-terrorism
 - * Anti-drug trafficking
 - * Population
 - * Food
 - * More subtle social indicators

If questions come up on the following subjects, recommend following answers:

1. Use of Journalists

- * Every effort made not to use but
- * Journalists are Americans first
- * No law will convince foreigners that press not working for government because in most nations that is the case.
- * Agree, the less said in public the better - let's drop

STAT

3. Quality of Intell

- * Excellent - consumers satisfied
- * No journalist in position to judge
- * No one below main consumer in position to judge, so you should use extreme care before draw conclusions based on comments of an analyst, NSC'er, Congress staffer. Only seeing part.
